Required Skills for PhD Students

Be independent: In a doctoral programme, it is learner-centred and students conduct their research with the assistance of a supervisor. Though the university may stipulate guidelines and expectations, it is the students' responsibility to complete the phases.

Be tenacious: As a PhD research thesis may take up to 4 years, students must be committed to complete the programme.

Be effective in time management: Students need to prioritise and manage tasks and commitments effectively to ensure completion of one task before moving on to the next. Focusing on goals is key.

Adapt to challenges: During your research journey, students may face obstacles and challenges in completing the research. Students need to adapt and be flexible to issues that may hinder progress of research.

Communicate effectively: To earn recognition as a PhD student and a researcher, students need to be confident in delivering the Research Proposal Defense and Viva Voce, as well as communicate effectively and clearly in writing the thesis.
